### ANOTHER OIL GUSHER

Beaumont Has Another Oil Well To Equal the Lucas.

Beaumont, Texas, March 26.—Beaumont is today in the second throes of an oil excitement seen here once before, and while it is very improbable that the excitement will reach the wild stage that it did before, yet there is now to be a more substantial development than followed the first discovery of oil.

At 5 o'clock this morning the second gusher was discovered on a ten acre tract of land owned by E. H. Adams and leased to the Texas Western Oil Company of Corsicana, formerly the Southwestern Oil Company, of which Mr. D. R. Beatty, a Galveston citizen, is the Beaumont representative and the fountain head from which flowed all the energy which served to bring the wealth of oil to the earth's surface. Strum Bros., of Corsicana, are the lucky contractors who drilled the well. The crew had kept the drill going until about 4 o'clock this morning, when a slight accident caused them to cease work and they deemed it expedient to await the coming day before starting again.

With this conclusion the crew, all save one, went to their beds and slept. While this man left to watch the well was attending to some duties about the boiler, some two hundred feet distant from the well, the oil burst from the confines beneath and forced its way out through the open pipe. It spouted about fifty feet high, where the flow was broken by a platform built in the derrick.

It is necessary to explain why this well is a better one than the Lucas well, and yet it did not spout as high and as forcibly. It will be remembered that the Lucas gusher blew out about 600 feet of four inch pipe, which was being used inside the six inch casing as a rotary drill. In the well today, Beatty's well, the pipe was not forced out, and consequently the oil has not a free escape. The four inch pipe within the six inch was closed at the bottom by the drill and the only escape for the oil was around the sides of the pipe, a space of about three-quarters of an inch. Yet with this impediment, the oil spurted through this small opening with tremendous force against the platform in the derrick, fifty feet above.

The oil is identically the same as the Lucas product. The well if permitted to flow unconfined, would force a six inch stream as high, if not higher than the Lucas well. It will do at a conservative estimate, 20,000 barrels per day, or as much as the Lucas well. Mr. Strum thinks the Lucas well is only good for 20,000 barrels.

By using the baking powder named "Perfect" you will show appreciation of pure food. Always use the "Perfect."

### Fraud in Maryland.

Washington, March 26.—In the investigation of alleged fraudulent census returns the Democrats claim they have discovered 684 names from gravestones in the Republican counties of St. Marys, Charles, Anne, Arundel, in Maryland. These names would have increased the Republican representation in the legislature by three under the state constitutional provisions, and the Democrats claim that if the scheme had remained undiscovered the Republicans would have had control of the legislature until next census. The investigation is proceeding.

See my line of matting that just arrived today. It's pretty, sure. C. R. JONES.

Nice, clean, fresh laces and embroideries which were not put on sale Saturday and this week for the reason that there was no counter room for them. Some not even unpacked and only slightly damaged while in original packages. Your prices buy them while they last at J. N. Barall's great fire sale. 5tf

### Cyclone Sufferers.

Birmingham, Ala., March 26.—Twenty dead from cyclone and ninety-five injured. Property loss a quarter of a million, sums up the result of yesterday's cyclone here. At a citizens' mass meeting at noon today the relief fund was raised to ten thousand dollars. Committees were appointed to distribute it. City is in mourning and much suffering among the unfortunate.
